

The WM20 is a compact and economical electrical rotating slip ring, standard model is composed of 3 wire for power transmission and 2 for signal/data channel. Thanks to the innovative material of the sliding contacts this slip ring, it requires extremely low maintenance operation and ensures a long service life. Its design guarantees an IP64 standard protection level, this characteristic makes it suitable for hard-working environments.

Technical specifications:

- Maintenance cycles only every 100 million revolution
- Easy cleaning
- High protection level IP64
- Suitable for PT100 signal and TCJ signal
- Service life: 500 millions revolution.

Applications:

- Packaging
- Packing
